5 Rules for Using Technology in Class

TOGETHER WE CAN USE TECH THE RIGHT WAY!

Created by Saanvi | 4th Grade | California

RULE 1

Use Technology for Learning

Classroom devices like tablets and laptops are tools for **schoolwork, research, and learning**, not for playing games or scrolling social media. When everyone stays focused on learning, the whole class moves forward together and gets more done during school time.

RULE 2

Handle Devices with Care

Always use technology with **clean hands, carry devices with two hands**, and never eat or drink near them. School devices are shared by many students, so taking good care of them means everyone can keep using them and the school does not have to spend money on repairs.

RULE 3

Ask Before You Click

Always **check with your teacher** before visiting an unfamiliar website, downloading a file, or clicking on a pop-up. Not every website is safe or trustworthy, so asking first keeps your personal information protected and helps you avoid scams or harmful content online.

RULE 4

Be Kind Online

Treat every person with **kindness and respect** in messages, comments, and shared documents, just like you would face-to-face. Words on a screen can still hurt real feelings. Being a good digital citizen means thinking before you type and making the internet a friendlier place.

RULE 5

Take Screen Breaks

Every **20 minutes, look away from your screen** for at least 20 seconds and focus on something far away. Too much screen time without breaks can cause eye strain, headaches, and tiredness. Protecting your health helps you stay alert, focused, and ready to learn all day long.

Technology is a Superpower — Use It Wisely!
